

# SPANESI

Computerized Electronic Measuring

THE COLLISION EQUIPMENT GROUP (CEG) has an exclusive contract to bring Spanesi's *Touch Electronic Measuring System* to the U.S. and Canadian body shop markets. Spanesi, based in Northern Italy, has been a highly regarded collision equipment manufacturer in Europe for over 45 years and is one of the leading equipment manufacturers in the world.

CEG spent countless hours searching for a sophisticated, yet affordable, machine that would address the needs of the North American repair shops. *Touch* is the answer.

We have lots of very satisfied customers using *Touch* who realize that the *Touch* system offers more features with fewer parts than any other system on the market.

- ¥ *Touch* sets up fast, measures in minutes and lets technicians monitor pulls while repairing damaged vehicles.
- ¥ Only six accessory pieces makes *Touch* much easier to use and offers little chance to lose all those small parts that come with our competitors' systems.
- ¥ When it comes to diagnosing damage and writing estimates, no one is quicker than *Touch*.
- ¥ Plus, the system is completely portable. Use it for repairs in one stall and wheel it to another area for diagnosis.

***Touch*** offers full upper body capability and even lets you measure parts, like struts, while off the car.

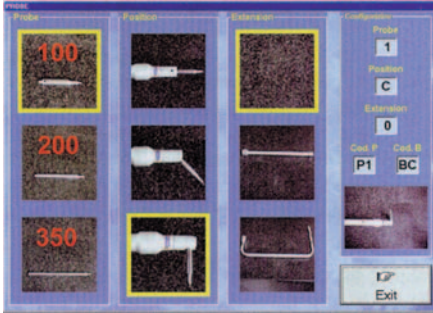

Air currents and noise do not affect the operation of the ***Touch*** system so you can use it under any circumstances.

And because ***Touch*** is fast and easy to use, an in-shop demonstration takes a lot less time than the other guys need.

We back up Spanesi's technology with the best group of sales and service personnel available anywhere.

**TOUCH** has a measuring arm with 5 articulated joints for measurement of any vehicle.

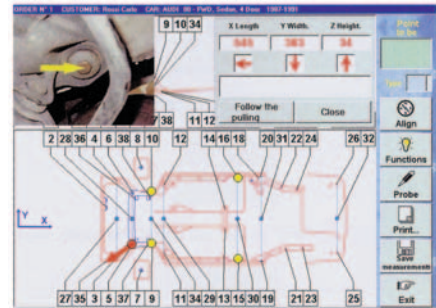

**TOUCH** lets you measure anywhere on a vehicle with only six accessories.

**TOUCH** shows you which way to pull and the “follow me” attachment lets you monitor the pull as you correct the damage.

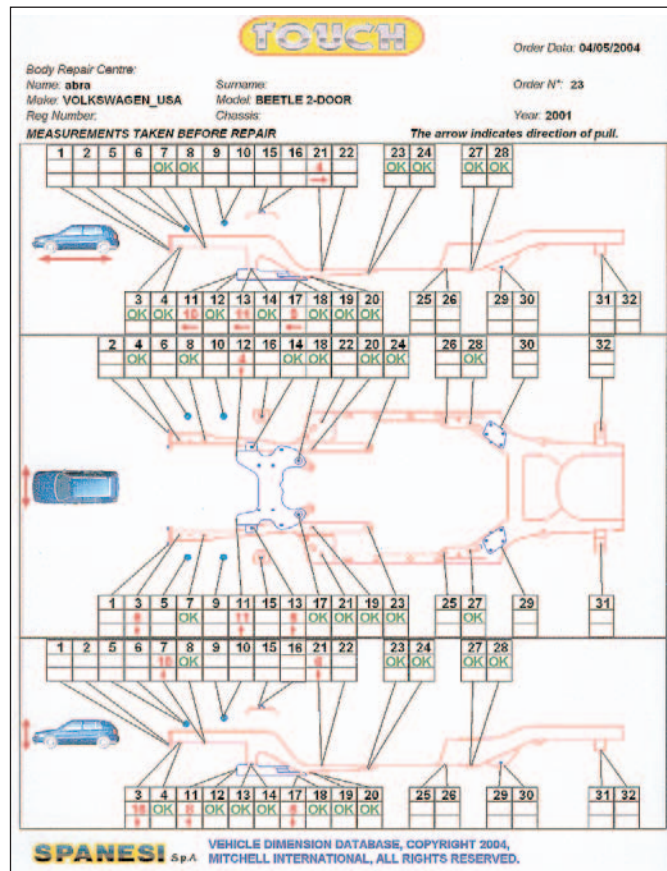

**TOUCH** has over 5500 vehicles in its data base.

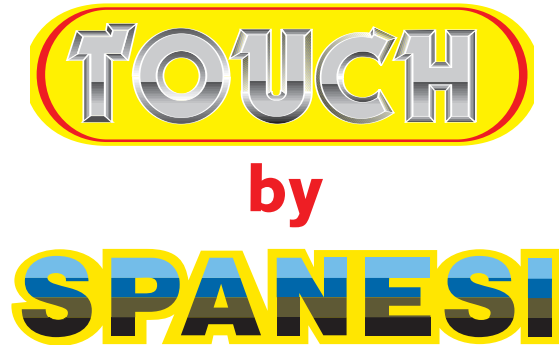

**TOUCH** versatility allows you to measure & document hundreds of under & upper body points.

**TOUCH** lets you diagnose and repair the damage. Printouts certify the pre- and post-repair dimensions.

**TOUCH** gives the easiest and fastest damage diagnosis. Lets shops write an accurate estimate. Improves scheduling and parts ordering and cuts supplementals.

## **TOP FEATURES**

**Fast  
User Friendly  
Accurate  
Versatile  
Outperforms Competition  
Priced Right**

- Create your own data sheets
- Check suspension & wheelbase
- Check runout
- Check struts, control arms, axle
- Check engine cradle & bumpers
- Use on a 2 post lift or rack
- Portable and compact
- Easy calibration check
- No targets, no probes
- Two year warranty

ALL EYES WERE FIXED UPON US. AN EXPENSIVE AXLE HOUSING WAS THE QUESTION. THE CUSTOMER JUST WANTED HIS VEHICLE FIXED RIGHT. THE DEALERSHIP WASN'T SURE. THE INSURANCE COMPANY WAS GOING TO HAVE A PROBLEM IF THIS DIDN'T FIX THE ISSUE.

THE TOUCH SYSTEM ALREADY HAS DATA ON MOST AMERICAN AND FOREIGN CARS AND TRUCKS HANDY AT THE KEYBOARD. UPPER AND LOWER DIMENSIONS. IT WAS FASTER THAN ANY OTHER MEASURING SYSTEM WE'VE EVER HAD, FOR OUR TECHS TO LEARN. THERE WERE NOT DRAWERS OF ADAPTERS FOR THEM TO LOOSE OR LEAVE ATTACHED TO CAR LOWERS.

WHAT ELSE IT HAS THAT MADE US A SUPERSTAR TO EVERYONE INVOLVED WAS THE ABILITY TO MEASURE MECHANICAL AND SUSPENSION PARTS. YES, THE TOUCH VERIFIED THAT THE AXLE HOUSING WAS BENT. THE PART WAS REPLACED. THE TRUCK WAS FIXED. ALL PARTIES WERE CONFIDENT THAT OUR STORE HAD THE RIGHT TOUCH. WE'RE SURE, THE DEALER, THE IINSURANCE COMPANY, AND THE CUSTOMER WILL ALWAYS LOOK TO US AS THE UNCHALLENGED EXPERTS.

PO Box 843  
Danville, IN 46122

Dear TJ,

I wanted to send you a quick note on our new Touch Computerized System. We purchased this from you on January 28 and it has become an essential tool to our technicians. Our lead technician is the one who suggested we purchase the Touch due to the functions and improvements it would make in our shop. Since we have had the Touch, not only has our lead technician been productive, but also our other technicians have become much more productive. This is been a great value for us, now that all of our technicians are running at top production. We feel that the Touch is fast, very affordable and efficient since it measures both upper, lower and side measurements. Having the Touch do all of these has saved us time and again has increased our productivity.

Thank you for the time you spent while doing demonstrations with my staff. I also want to thank you for your continued support with training and any questions we have had.

Thank you,

Eric Sobczak
